

**January  
2012**

## **GSFC Photography Club**

Next Photo Club Meeting:  
January 11<sup>th</sup>, 2012

### **FLASH!**

**January's meeting will showcase club vice president Bob Peters, who will be giving a presentation on the use of flash in photography. He will discuss the different types of flash that are available to photographers, how to use a flash appropriately and different techniques one can apply when using flash for photography, plus much, much more.**

**Please note** that the start time/end time for this month's meeting has been pushed up by 15 min to avoid a conference room conflict. The meeting will start promptly at 11:45 and will end at 12:45.

Building 12 Room N112

### **We're still looking!**

- **For some space!** The club has discussed purchasing equipment, such as a printer/scanner and laptop but we are in need of a space to put it! Please check with your projects and FOMs to help identify any possible spaces available; preferably easily accessed, copier room/storage area, 50-100 sq. ft would be sufficient.
- **For members to lead an outing!** If you are interested in stepping-up to the plate and hosting a group outing please bring your enthusiasm and ideas to the next photo club meeting.
- **For dates!** Photo Club members have organized a 3-session Introduction to Digital Photography course starting in January, but exact dates still need to be determined. Each session to be held over the lunch hour with potential for follow-up, practice outings. Session topics: Exposure, How to use your camera and Composition. Please contact Scott Hull if you are interested in attending, and let him know what dates are best for you.

### *In other news...*

#### **Bill Ingalls**

##### **Retrospective NASA photography**

The photo club executive board has spoken with photographer Bill Ingalls about presenting at Goddard! Due to the response expected, the club executive board is working with Goddard Public Affairs Office to determine the correct space and time for the presentation.

Bill has worked with NASA for over 18 years, photographed launches from the swamps of Florida to the desolate desert of Kazakhstan.

#### **Calibration Device has been purchased!**

After many hours of research by club member Bill Dusterwald and deliberations by the club executive board a decision was made to purchase the **X-Rite ColorMunki Photo Color Management Solution**. Once the calibration device has arrived and the board has an opportunity to check it for defects (aka determine how to use it,) it will be made available to club members to use. Rules and regulations will apply.
